Deadline for manuscript submissions: closed (30 April 2021)

## Message from the Guest Editor

Dear Colleagues,

Polymer membranes are used on a large scale in many separation processes. Applications for these membranes include the desalination of seawater, gas separation, the cleaning of industrial effluents, the fractionation of macromolecular solutions in the food and drug industries, and the controlled release of drugs in medicine. Membrane separation is in many cases faster, more efficient, less energy-demanding, and thus more economical than conventional separation techniques.

Separation and/or purification processes may be categorized into the following three separate classes: (1) concentration-driven separation, represented by processes such as dialysis; (2) electro-membrane separation, used to separate dissolved charged ions; and (3) pressure-driven separation, which includes the more familiar processes of micro-/nano-/ultra-filtration and gas separation.

The aim of this Special Issue is to highlight the progress and fundamental aspects of the synthesis, characterization, properties, and application of polymer membranes in various separation activities.

### Message from the Editor-in-Chief

Since its foundation in 2009, *Polymers* has developed into an internationally renowned, extremely successful open access journal. The editorial team and the editorial board dedicatedly combine open-access publishing and highquality rigorous peer reviewing. The performance of the journal has proven this strategy to be well-suited and highly successful. This is reflected in the increasing impact factor of *Polymers*, the most recent one being 5.0.

I would like to invite you to contribute to the success of the journal by sending us your high quality research papers. We would be pleased to welcome you as one of our authors.

## **Author Benefits**

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), Ei Compendex, PubMed, PMC, FSTA, CAPlus / SciFinder, Inspec, and other databases.

Journal Rank: JCR - Q1 (Polymer Science) / CiteScore - Q1 (General Chemistry)
