Deadline for manuscript
submissions:

closed (15 April 2019)

Message from the Guest Editor

This Special Issue focuses on the current state-of-the-art of metallopolymers and metal-containing systems. This cross-disciplinary field is being explored by taking advantage of relatively well-developed polymers and organometallic chemistries, lead to exciting discoveries, contributing significantly to supramolecular chemistry and material science. e.g., a new polymerization technique, migration insertion polymerization (MIP), has been created, resulting from an effort to produce air-stable metal carbonyl polymers; self-assembly of metal containing polymers has led to the discovery of living self-assembly; and metal coordination geometry and bonding structures are being harnessed in several systems for designed and stepwise synthesis of nanostructures. Meanwhile, effort has produced a broad range of materials derived from metal coordination structures and the properties of metal elements, such as metal-organic frameworks (MOFs).

Papers are sought that discuss the latest research in the area. The scope of the Special Issue encompasses the synthesis, characterization and applications of either metallopolymers or metal-containing self-assembled and coordination systems.

an Open Access Journal by MDPI

Editor-in-Chief

Prof. Dr. Alexander Böker

Lehrstuhl für Polymermaterialien
und Polymertechnologie,
University of Potsdam, 14476
Potsdam-Golm, Germany

Message from the Editor-in-Chief

Since its foundation in 2009, *Polymers* has developed into an internationally renowned, extremely successful open access journal. The editorial team and the editorial board dedicatedly combine open-access publishing and high-quality rigorous peer reviewing. The performance of the journal has proven this strategy to be well-suited and highly successful. This is reflected in the increasing impact factor of *Polymers*, the most recent one being 5.0.

I would like to invite you to contribute to the success of the journal by sending us your high quality research papers. We would be pleased to welcome you as one of our authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, PubMed, PMC, FSTA, CAPlus / SciFinder, Inspec, and other databases.

Journal Rank: JCR - Q1 (Polymer Science) / CiteScore - Q1 (General Chemistry)
