

Polymer Nanocapsules

Guest Editors:

Prof. Dr. Marta Giamberini

Department of Chemical Engineering, University Rovira i Virgili, Av. Països Catalans 26, Campus Sescelades, 43007 Tarragona, Spain

Dr. Bartosz Tylkowski

1. Centre Tecnològic de la Química, Tarragona, Spain
2. Department of Chemical Engineering (DEQ), Universitat Rovira i Virgili, 43007 Tarragona, Spain

Deadline for manuscript submissions:

closed (25 October 2018)

Message from the Guest Editors

Nanoencapsulation technologies have attracted considerable research interest over the last few years to develop advanced materials for a wide range of applications, such as: medicine, pharmaceutical, imaging technology, catalysis and agriculture. Polymeric nanocapsules consist of a liquid/solid core in which the active material is placed into a cavity, which is surrounded by a distinctive natural or synthetic polymeric membrane. By a proper design of the polymeric shell, release can be tuned and controlled by different external stimuli such as light, pH, temperature, etc. As nanostructures possess greater capability to take on an extensive range of applications with extremely high and efficient reproducibility, encapsulating in the nanoscale exhibits several advantages over macro- and microencapsulation. This Special Issue aims to provide the readers with a comprehensive and in-depth understanding of recent developments and innovative application in this field.

an Open Access Journal by MDPI

Editor-in-Chief

Prof. Dr. Alexander Böker

Lehrstuhl für Polymermaterialien
und Polymertechnologie,
University of Potsdam, 14476
Potsdam-Golm, Germany

Message from the Editor-in-Chief

Since its foundation in 2009, *Polymers* has developed into an internationally renowned, extremely successful open access journal. The editorial team and the editorial board dedicatedly combine open-access publishing and high-quality rigorous peer reviewing. The performance of the journal has proven this strategy to be well-suited and highly successful. This is reflected in the increasing impact factor of *Polymers*, the most recent one being 5.0.

I would like to invite you to contribute to the success of the journal by sending us your high quality research papers. We would be pleased to welcome you as one of our authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, PubMed, PMC, FSTA, CAPlus / SciFinder, Inspec, and other databases.

Journal Rank: JCR - Q1 (Polymer Science) / CiteScore - Q1 (General Chemistry)
