Message from the Guest Editor

Dear Colleagues,

Recently, protein-based biopolymers such as silk fibroin, silk sericin, wool keratin, collagen, gelatin, soy protein, etc. have attracted researchers' attention because they have unique properties, including good biocompatibility, excellent cytocompatibility, and biodegradability. Owing to these useful properties, studies on the protein-based polymers have been extensively performed to apply them to various products, including cosmetics, biomedical products, and ecofriendly products.

In this Special Issue, researchers from both academia and industry are invited to submit their latest studies on protein-based biopolymers. The objective of this Special Issue is to provide a platform for knowledge and experience exchange on the preparation, structure, properties, and applications of protein-based biopolymers.

Message from the Editor-in-Chief

Since its foundation in 2009, *Polymers* has developed into an internationally renowned, extremely successful open access journal. The editorial team and the editorial board dedicatedly combine open-access publishing and high-quality rigorous peer reviewing. The performance of the journal has proven this strategy to be well-suited and highly successful. This is reflected in the increasing impact factor of *Polymers*, the most recent one being 5.0.

I would like to invite you to contribute to the success of the journal by sending us your high quality research papers. We would be pleased to welcome you as one of our authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, PubMed, PMC, FSTA, CAPlus / SciFinder, Inspec, and other databases.

Journal Rank: JCR - Q1 (Polymer Science) / CiteScore - Q1 (General Chemistry)
