Theoretical and Computational Polymers Science: Physics, Chemistry and Biology

Message from the Guest Editor

The theoretical descriptions should be illustrated by discussing suitable applications to specific problems related to structural, transport and dynamical properties of linear polymers, modelled, e.g., by worm-like (reptation) and Monte Carlo-type methods. The latter are suitable for generating long and densely packed self-avoiding chains in different problems, such as the growth of thin polymeric films of nanometre size, their transport behaviour in disordered environments, and their actual packing within confined volumes such as the nucleus of a cell. The studies of polymer networks, and associated anomalous rheological properties, are welcome in view of the possible connections with fractal scaling and fractional dynamics.

About the Journal

Message from the Editor-in-Chief

Since its foundation in 2009, *Polymers* has developed into an internationally renowned, extremely successful open access journal. The editorial team and the editorial board dedicatedly combine open-access publishing and high-quality rigorous peer reviewing. The performance of the journal has proven this strategy to be well-suited and highly successful. This is reflected in the increasing impact factor of *Polymers*, the most recent one being 4.9.

I would like to invite you to contribute to the success of the journal by sending us your high quality research papers. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Alexander Böker

Fraunhofer-Institut für Angewandte Polymerforschung, Lehrstuhl für Polymermaterialien und Polymertechnologie, Universität Potsdam, Geiselbergstraße 69, 14476 Potsdam-Golm, Germany

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, PubMed, PMC, FSTA, CAPIus / SciFinder, Inspec, and other databases.

Journal Rank:

JCR - Q1 (Polymer Science) / CiteScore - Q1 (General Chemistry)
