

Special Issue

Manufacturing and Testing of Polymer Composites

Message from the Guest Editors

The growing interest in innovative and performing materials has made composite materials an object of interest for research due to their excellent strength/weight ratio and the variety of fields of application (aerospace, automotive, sports, construction). Many studies concern the research of new techniques for the realization of composites with polymer matrix and fiber reinforcements, from pultrusion to filament winding. However, these conventional techniques require the use of molds, and this inevitably raises costs. Other studies, on the other hand, concern the optimization of processes for existing techniques, to obtain high-performance and at the same time light materials. The present Special Issue aims to focus on research related to innovative technologies, manufacturing processes, and composite materials for high-performance components. Contributions may be related to conventional or unconventional processes, highlighting novel aspects of processing and manufacturing methods, coating technology, and fiber treatments and materials that can be used to obtain high-performance components.

About the Journal

Message from the Editor-in-Chief

Since its foundation in 2009, *Polymers* has developed into an internationally renowned, extremely successful open access journal. The editorial team and the editorial board dedicatedly combine open-access publishing and high-quality rigorous peer reviewing. The performance of the journal has proven this strategy to be well-suited and highly successful. This is reflected in the increasing impact factor of *Polymers*, the most recent one being 4.7.

I would like to invite you to contribute to the success of the journal by sending us your high quality research papers. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Alexander Böker

Lehrstuhl für Polymermaterialien und Polymertechnologie, University of
Potsdam, 14476 Potsdam-Golm, Germany

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, PubMed, PMC, FSTA, CAPlus / SciFinder, Inspec, and other databases.

Journal Rank:

JCR - Q1 (Polymer Science) / CiteScore - Q1 (General Chemistry & Polymers and Plastics)
