### Message from the Guest Editors

Dear Colleagues,

We cordially invite you to publish your relevant latest research in this Special Issue, either as a critical review or a research article. Based on your expertise and your recent publications, we believe that you would make a strong contribution to the technical content of our Special Issue.

This Special Issue will be dedicated to processes in biofuel production and biomass valorization, involving the following topics, among other possibilities: sustainable oxygenated and non-oxygenated biofuels, such as hydrogen, biogas, ethanol, biodiesel, green diesel, and sustainable aviation fuels; advanced biobased polymeric materials; furan derivatives from industrially available carbohydrate sources; biomass fractionation using advanced pretreatment technologies; bioprocess development and optimization; heterogeneous catalysis applied to biomass conversion; biorefineries.

We look forward to receiving your valuable contribution.

## Message from the Editor-in-Chief

*Processes* (ISSN 2227-9717) provides an advanced forum for process/system-related research in chemistry, biology, material, energy, environment, food, pharmaceutical, manufacturing and allied engineering fields. The journal publishes regular research papers, communications, letters, short notes and reviews. Our aim is to encourage researchers to publish their experimental, theoretical and computational results in as much detail as necessary. There is no restriction on paper length or number of figures and tables.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, AGRIS, and other databases.

**Journal Rank:** JCR - Q2 (*Engineering, Chemical*) / CiteScore - Q2 (*Chemical Engineering (miscellaneous)*)
