### Message from the Guest Editor

This Special Issue "Feature Papers in the "Food Process Engineering" Section" is dedicated to all aspects concerning the engineering aspects of food processing, starting from the characterization of the physicochemical properties of raw materials, through to their transportation, storage, and processing, and up to the characterization of the final products. Given this context, this Special Issue aims to gather high-quality research focused on innovations in food process engineering. Topics of interest include, but are not limited to, the following areas:

- Physicochemical properties of raw materials and food products;
- Modern food processing methods;
- Unit operations in food production;
- Energy-efficient food processing methods;
- Utilization of byproducts in food processing;
- Sustainable food production;
- New food product design;
- Trends in food process engineering.

## Message from the Editor-in-Chief

You are invited to contribute either a research article or a comprehensive review for consideration and publication in *Processes* (ISSN 2227-9717). *Processes* is published in open access format – research articles, reviews, and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited, free access to the content. As an open access journal, *Processes* is supported by the authors and their institutes through the payment of article processing charges (APCs) for accepted papers. We would be pleased to welcome you as one of our authors.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, AGRIS, and other databases.

**Journal Rank:** JCR - Q2 (*Engineering, Chemical*) / CiteScore - Q2 (*Chemical Engineering (miscellaneous)*)
