Message from the Guest Editor

Dear Colleagues,

Lactic acid bacteria are ubiquitous and have applications in almost every sector of the food industry, as well as in probiotics. They preserve, provide aromas in addition to flavors, and have proven benefits for health as well as many other areas of real and potential recent application.

This Special Issue will receive quality papers that present results that allow increasing knowledge on and applications of lactic acid bacteria. Topics include, but are not limited to, the following:

- Isolation of LAB of interest from conventional or novel sources.
- Potential or actual use of LAB in food or for feeding purposes.
- LAB with interesting antimicrobial characteristics (antibacterial, antifungal, etc.).
- Identification of new LAB.
- Production of novel metabolites by LAB.

Dr. Alfredo Vázquez-Ovando

Message from the Editor-in-Chief

You are invited to contribute either a research article or a comprehensive review for consideration and publication in *Processes* (ISSN 2227-9717). *Processes* is published in open access format – research articles, reviews, and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited, free access to the content. As an open access journal, *Processes* is supported by the authors and their institutes through the payment of article processing charges (APCs) for accepted papers. We would be pleased to welcome you as one of our authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, AGRIS, and other databases.

Journal Rank: JCR - Q2 (*Engineering, Chemical*) / CiteScore - Q2 (*Chemical Engineering (miscellaneous)*)
