Message from the Guest Editors

Dear Colleagues,

Supported catalysts constitute a pivotal part of heterogeneous catalysts. With the advances in inorganic synthesis and characterization techniques, numerous research highlights related to the study of metal–support interactions have emerged, including single-atom catalysis, in-situ/operando characterizations and dynamic structural evolution. The interaction and synergy between metals and supports have received a great deal of research attention. By regulating the size, configuration and chemical states of the active sites, metal–support interactions play a key role in controlling catalytic performance. Deep understanding and insights in studying metal–support interactions in different catalyst systems is very likely to benefit the design strategies of novel heterogeneous catalysts.

This Special Issue on “Metal-Support Interactions in Heterogeneous Catalysis” seeks the latest advances in heterogeneous catalysis focusing on the study of metal–support interactions for thermal, electro- and photo-catalysis.

Message from the Editor-in-Chief

You are invited to contribute either a research article or a comprehensive review for consideration and publication in *Processes* (ISSN 2227-9717). *Processes* is published in open access format – research articles, reviews, and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited, free access to the content. As an open access journal, *Processes* is supported by the authors and their institutes through the payment of article processing charges (APCs) for accepted papers. We would be pleased to welcome you as one of our authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, AGRIS, and other databases.

Journal Rank: JCR - Q2 (*Engineering, Chemical*) / CiteScore - Q2 (*Chemical Engineering (miscellaneous)*)
