Message from the Guest Editors

This special issue on “Application of Chemical Smart Manufacturing in Industry 4.0” seeks high quality works focusing on the latest novel advances in smart manufacturing technology for chemicals. Topics include, but are not limited to:

- Smart data collection devices and database systems for chemical manufacturing
- IoT and cloud platforms for data exchange for chemical manufacturing
- Big-data and AI-based predictive analytics and decision-making for chemical manufacturing
- Decision implementation mechanisms for chemical process control, automation, and optimization
- Digital twins of chemical industry equipment

Message from the Editor-in-Chief

You are invited to contribute either a research article or a comprehensive review for consideration and publication in *Processes* (ISSN 2227-9717). *Processes* is published in open access format – research articles, reviews, and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited, free access to the content. As an open access journal, *Processes* is supported by the authors and their institutes through the payment of article processing charges (APCs) for accepted papers. We would be pleased to welcome you as one of our authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, AGRIS, and other databases.

Journal Rank: CiteScore - Q2 (Chemical Engineering (miscellaneous))
