

## **Ammonia/Hydrogen Combustion in Internal Combustion Engines: Recent Advances**

Guest Editors:

**Dr. Raouf Mobasheri**

**Dr. Xiang Li**

**Prof. Dr. Abdel Aitouche**

Deadline for manuscript  
submissions:

**closed (30 November 2023)**

### **Message from the Guest Editors**

In recent years, many studies have been conducted on the use of alternative fuels for internal combustion engines (ICEs). A lot of attention is currently being paid to ammonia ( $\text{NH}_3$ ) and hydrogen ( $\text{H}_2$ ) as zero-carbon alternatives. This Special Issue aims to present recent advances and research in ammonia/hydrogen combustion, focusing on internal combustion engines, both practical and theoretical, to demonstrate how hydrogen and ammonia affect engine characteristics and performance. This Special Issue also welcomes submissions on other related technologies that could reduce emissions from internal combustion engines.

an Open Access Journal by MDPI

Technology, University of Turin,  
Via P. Giuria 9, 10125 Turin, Italy

## Message from the Editor-in-Chief

You are invited to contribute either a research article or a comprehensive review for consideration and publication in *Processes* (ISSN 2227-9717). *Processes* is published in open access format – research articles, reviews, and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited, free access to the content. As an open access journal, *Processes* is supported by the authors and their institutes through the payment of article processing charges (APCs) for accepted papers. We would be pleased to welcome you as one of our authors.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, AGRIS, and other databases.

**Journal Rank:** CiteScore - Q2 (Chemical Engineering (miscellaneous))
