Deadline for manuscript
submissions:

closed (15 June 2024)

Message from the Guest Editors

This Special Issue on electrochemistry research in materials' corrosion and protection collates novel and original research articles and review articles that contribute to developments in the deployment of electrochemistry techniques and methods in our understanding of materials' corrosion and degradation in a wide range of industrial applications and energy systems. This Special Issue also welcomes research and review articles focused on the innovative application of electrochemical methods and techniques in the development of translatable mitigation and protection strategies against materials' corrosion and degradation across all demanding industrial applications and energy systems. As such, this Special Issue covers the following research topics:

- Corrosion mechanisms and/or control in energy and electrochemically aggressive environments;
- The development of corrosion-resistant materials and methods;
- Testing and monitoring technology for materials' corrosion and overall degradation;
- Electrochemistry-inspired corrosion mitigation;
- Functional assessment of corrosion behaviour and resilience of material and coating interface.

an Open Access Journal by MDPI

Editor-in-Chief

Prof. Dr. Giancarlo Cravotto

Department of Drug Science and
Technology, University of Turin,
Via P. Giuria 9, 10125 Turin, Italy

Message from the Editor-in-Chief

You are invited to contribute either a research article or a comprehensive review for consideration and publication in *Processes* (ISSN 2227-9717). *Processes* is published in open access format – research articles, reviews, and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited, free access to the content. As an open access journal, *Processes* is supported by the authors and their institutes through the payment of article processing charges (APCs) for accepted papers. We would be pleased to welcome you as one of our authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, AGRIS, and other databases.

Journal Rank: JCR - Q2 (*Engineering, Chemical*) / CiteScore - Q2 (*Chemical Engineering (miscellaneous)*)
