

Advances in Green Chemistry Processes: Isolation, Characterization and Applications of Plant-Derived Bioactive Compounds

Guest Editors:

Prof. Dr. Jasna Čanadanović-Brunet

Department of Applied and Engineering Chemistry, Faculty of Technology Novi Sad, University of Novi Sad, Bulevar cara Lazara 1, 21000 Novi Sad, Serbia

Dr. Olja Šovljanski

Faculty of Technology Novi Sad, Department of Biotechnology, University of Novi Sad, Bulevar Cara Lazara 1, 21000 Novi Sad, Serbia

Deadline for manuscript submissions:

30 January 2025

Message from the Guest Editors

Dear Colleagues,

Growing public and consumer demand, accompanied by ongoing research efforts to investigate the qualities and prospective applications of nutraceutical substances, have led to an increased interest in processes related to bioactive compounds, phytochemicals, and functional foods. Also the processing of plants results in high amounts of bio-wastes (by-products) which causes economic and ecological deficit problems. In this context, the current Special Issue is open to scientific research submissions correlated to developing, upgrading and mathematical analyses obtaining plant-derived and health-promoting bioactive compounds. Characterization of these bioactives can provide functional benefits that play a crucial role in disease prevention caused by oxidative stress. A special emphasis will be given to eco-friendly technologies and processes with a deep insight into bioactivities characterization using analytical methodologies, in vitro assays, as well as in silico and in vivo studies to evaluate pro-healthy effects, including anti-inflammatory, antimicrobial, antioxidant properties and application safety, addressing potential final applications.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

You are invited to contribute either a research article or a comprehensive review for consideration and publication in *Processes* (ISSN 2227-9717). *Processes* is published in open access format – research articles, reviews, and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited, free access to the content. As an open access journal, *Processes* is supported by the authors and their institutes through the payment of article processing charges (APCs) for accepted papers. We would be pleased to welcome you as one of our authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, AGRIS, and other databases.

Journal Rank: JCR - Q2 (*Engineering, Chemical*) / CiteScore - Q2 (*Chemical Engineering (miscellaneous)*)
