Message from the Guest Editors

Dear Colleagues,

These days, extensive research and development in the field of heat and mass transfer for energy engineering span from large macroscopic scales to nanoscales systems and devices, with the application in thermal and nuclear power engineering, energy engineering for the utilization of biomass, solar, wind, geothermal and hydro renewables, hydrogen production, transport, and utilization, as well as energy storage, residential, industrial and public heating, cooling, prime movers in transportation, etc.

Topics include, but are not limited to:

- Fundamental research in heat and mass transfer with the foreseen application in energy engineering;
- Advanced designs of energy devices, equipment and plants with heat and mass transfer processes;
- New experimental, theoretical and methods of numerical simulations for the investigation and prediction of heat and mass transfer with application in energy engineering.

Prof. Dr. Vladimir D. Stevanovic

Message from the Editor-in-Chief

You are invited to contribute either a research article or a comprehensive review for consideration and publication in *Processes* (ISSN 2227-9717). *Processes* is published in open access format – research articles, reviews, and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited, free access to the content. As an open access journal, *Processes* is supported by the authors and their institutes through the payment of article processing charges (APCs) for accepted papers. We would be pleased to welcome you as one of our authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, AGRIS, and other databases.

Journal Rank: JCR - Q2 (*Engineering, Chemical*) / CiteScore - Q2 (*Chemical Engineering (miscellaneous)*)
