Message from the Guest Editor

Heterogeneously catalysed reactions are playing an increasingly important role in modern chemistry. In many areas of environmental and climate protection as well as sustainable energy supply, heterogeneous catalysts are used to make chemical processes faster, safer, more environmentally friendly and/or cheaper. As a result, the scientific search for more effective heterogeneous catalysts remains a constant task for application-oriented research. This includes further research into traditional and special methods for the preparation of metallic, oxide and multifunctional catalyst systems, the possibilities of their textural, structural and surface chemical characterization, the investigation of their activity, selectivity and long-term stability as well as the discovery of the physical–chemical aspects their mode of action. This Special Issue offers a suitable platform for catalysis researchers to report on the latest scientific findings and experiences in the development and practical use of heterogeneous catalysts.

an Open Access Journal by MDPI

Editor-in-Chief

Prof. Dr. Giancarlo Cravotto

Department of Drug Science and
Technology, University of Turin,
Via P. Giuria 9, 10125 Turin, Italy

Message from the Editor-in-Chief

You are invited to contribute either a research article or a comprehensive review for consideration and publication in *Processes* (ISSN 2227-9717). *Processes* is published in open access format – research articles, reviews, and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited, free access to the content. As an open access journal, *Processes* is supported by the authors and their institutes through the payment of article processing charges (APCs) for accepted papers. We would be pleased to welcome you as one of our authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, AGRIS, and other databases.

Journal Rank: JCR - Q2 (*Engineering, Chemical*) / CiteScore - Q2 (*Chemical Engineering (miscellaneous)*)
