Message from the Guest Editors

The importance of addressing climate change and reducing its negative environmental effects is widely acknowledged across the world. The central focus of this discussion pertains to achieving the goal of sustainable development, wherein energy systems and renewable technologies play a crucial role. This Special Issue aims to explore the intersection of these domains, emphasizing how renewable energy technologies can foster the sustainability of energy systems, and thus accelerate the pace of sustainable development.

We invite scholars, practitioners, and experts from diverse disciplines to contribute original research articles, comparative analyses, reviews, case studies, and cutting-edge research, with an emphasis on providing actionable insights for policy and decision makers. We welcome both empirical and theoretical contributions addressing novel methods and practices that aid the progression of sustainable energy systems and renewable technologies. Submissions may cover, but are not limited to, renewable energy technologies, energy system, energy for economic development, environmental sustainability, sustainability policies, and socio-economic implications, among others.

Technology, University of Turin,
Via P. Giuria 9, 10125 Turin, Italy

Message from the Editor-in-Chief

You are invited to contribute either a research article or a comprehensive review for consideration and publication in *Processes* (ISSN 2227-9717). *Processes* is published in open access format – research articles, reviews, and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited, free access to the content. As an open access journal, *Processes* is supported by the authors and their institutes through the payment of article processing charges (APCs) for accepted papers. We would be pleased to welcome you as one of our authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, AGRIS, and other databases.

Journal Rank: JCR - Q2 (*Engineering, Chemical*) / CiteScore - Q2 (*Chemical Engineering (miscellaneous)*)
