Deadline for manuscript submissions:
15 August 2024

Message from the Guest Editors

In recent years, there has been growing interest in utilizing hydrogen as a clean and sustainable energy carrier, particularly in the context of transitioning to a low-carbon economy. Electrochemical methods have emerged as promising strategies for hydrogen production, storage, and utilization due to their efficiency, scalability, and environmental friendliness. This Special Issue seeks to shed light on the latest research and developments in electrochemical processes for hydrogen energy preparation.

Topics of interest include, but are not limited to, the following:

1. hydrogen evolution and oxidation reaction
2. electrochemical water electrolysis
3. hydrogen production
4. electrochemical cells and reactors
5. electrochemical hydrogen storage
6. proton exchange membrane fuel cells

Editor-in-Chief

Prof. Dr. Giancarlo Cravotto
Department of Drug Science and Technology, University of Turin, Via P. Giuria 9, 10125 Turin, Italy

Message from the Editor-in-Chief

You are invited to contribute either a research article or a comprehensive review for consideration and publication in *Processes* (ISSN 2227-9717). *Processes* is published in open access format – research articles, reviews, and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited, free access to the content. As an open access journal, *Processes* is supported by the authors and their institutes through the payment of article processing charges (APCs) for accepted papers. We would be pleased to welcome you as one of our authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.
High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, AGRIS, and other databases.
Journal Rank: JCR - Q2 (*Engineering, Chemical*) / CiteScore - Q2 (*Chemical Engineering (miscellaneous)*)
