

## Platform Chemicals and Novel Materials from Biomass

Guest Editors:

**Prof. Dr. Miguel Ladero Galán**

FQPIMA Group, Department of  
Chemical Engineering, College of  
Chemical Sciences, Complutense  
University of Madrid, 28040  
Madrid, Spain

**Dr. Juan M. Bolivar**

Department of Chemical  
Engineering, School of Chemical  
Sciences, Complutense  
University of Madrid, Madrid,  
Spain

Deadline for manuscript  
submissions:

**30 September 2024**

### Message from the Guest Editors

The current situation of global economic growth, with a significant number of extraordinarily populated emerging countries, coupled with environmental degradation and the finite nature of mineral and fossil resources, may find a solution, at least partially, in the use of resources created by living beings through photosynthesis and a wide range of metabolic transformations: biomass. At the same time, the knowledge acquired during the 20th century in the transformation of fossil and biomass resources (food, paper and cellulose) is the cognitive basis for the creation of the biorefinery concept and the underlying technologies. This Special Issue focuses on the final, transformative part of these biomass resources into chemicals and materials that are to supplement, first and foremost, and ultimately replace those coming from fossil resources. This transformation is based on heat-driven and catalytic/biocatalytic processes.

## Message from the Editor-in-Chief

You are invited to contribute either a research article or a comprehensive review for consideration and publication in *Processes* (ISSN 2227-9717). *Processes* is published in open access format – research articles, reviews, and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited, free access to the content. As an open access journal, *Processes* is supported by the authors and their institutes through the payment of article processing charges (APCs) for accepted papers. We would be pleased to welcome you as one of our authors.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, AGRIS, and other databases.

**Journal Rank:** JCR - Q2 (*Engineering, Chemical*) / CiteScore - Q2 (*Chemical Engineering (miscellaneous)*)
