Deadline for manuscript
submissions:
closed (20 March 2024)

Message from the Guest Editor

The field of polymer-based biomaterials (biopolymer) development has seen tremendous potential and research interest due to their tunable characteristics, biocompatibility, and enhanced bioavailability, especially when used as nanomaterials. This has led to rapid development in the delivery of drugs, small molecules, genes, and antibodies against a variety of diseases. Their application ranges widely from surgery, wound healing, and cancer management to tissue engineering, surface-modified medical devices, implants, immunotherapy, theranostics, and drug/gene delivery system formulation.

This Special Issue of *Processes* aims to provide a platform for biopolymer researchers and materials scientists to disseminate their results. We aim to curate novel advances in recent cutting-edge developments in the area of biopolymers and nanomaterials developed for biomedical applications.

Any contributions related to biopolymer development, biocompatibility, surface functionalization, antimicrobial activity, drug delivery, and tissue engineering are all welcome.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

You are invited to contribute either a research article or a comprehensive review for consideration and publication in *Processes* (ISSN 2227-9717). *Processes* is published in open access format – research articles, reviews, and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited, free access to the content. As an open access journal, *Processes* is supported by the authors and their institutes through the payment of article processing charges (APCs) for accepted papers. We would be pleased to welcome you as one of our authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, AGRIS, and other databases.

Journal Rank: JCR - Q2 (*Engineering, Chemical*) / CiteScore - Q2 (*Chemical Engineering (miscellaneous)*)
