Message from the Guest Editors

Dear Colleagues,

Thermal and fluid sciences are a field of engineering that finds usage within the areas of both conventional and sustainable energy. This Special Issue on “Thermal and Fluid Flow Processes in Sustainable and Conventional Energy” seeks high-quality manuscripts focusing on novel and significant developments in the area of thermal and fluid science applications in relation to conventional and sustainable energy. Studies associated with computational fluid dynamics (CFD), heat transfer, experimental fluid dynamics, and theoretical research in these areas are highly encouraged. Topics include, but are not limited to, the following:

- Petroleum engineering;
- Fossil fuels;
- Wind energy;
- Solar energy;
- Carbon capture and sequestration;
- Stormwater management.

Message from the Editor-in-Chief

Processes (ISSN 2227-9717) provides an advanced forum for process/system-related research in chemistry, biology, material, energy, environment, food, pharmaceutical, manufacturing and allied engineering fields. The journal publishes regular research papers, communications, letters, short notes and reviews. Our aim is to encourage researchers to publish their experimental, theoretical and computational results in as much detail as necessary. There is no restriction on paper length or number of figures and tables.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, AGRIS, and other databases.

Journal Rank: JCR - Q2 (*Engineering, Chemical*) / CiteScore - Q2 (*Chemical Engineering (miscellaneous)*)
