Deadline for manuscript submissions:

**closed (25 April 2024)**

### **Message from the Guest Editors**

With the development of human society and the increase in the demand for water, water pollution is becoming increasingly serious. Types of wastewater mainly include domestic sewage and industrial wastewater (dyeing wastewater, coking wastewater, leather wastewater, pharmaceutical wastewater, etc.). The harmful chemical components in wastewater discharged into natural water bodies without treatment will cause devastating disasters to the water quality and aquatic organisms. The consumption of polluted water can also cause a variety of diseases. Therefore, wastewater must be treated so that it meets environmental discharge standards. The technology used to treat wastewater includes physical treatment, biological treatment, and chemical treatment. This Special Issue, entitled “Process Optimization and Technology Development of Water Pollution Control”, focuses on the latest novel developments in approaches and technology for the control of water pollution. This issue will publish new research papers, reviews, case reports, conference papers, etc.

an Open Access Journal by MDPI

## Message from the Editor-in-Chief

You are invited to contribute either a research article or a comprehensive review for consideration and publication in *Processes* (ISSN 2227-9717). *Processes* is published in open access format – research articles, reviews, and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited, free access to the content. As an open access journal, *Processes* is supported by the authors and their institutes through the payment of article processing charges (APCs) for accepted papers. We would be pleased to welcome you as one of our authors.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, AGRIS, and other databases.

**Journal Rank:** JCR - Q2 (*Engineering, Chemical*) / CiteScore - Q2 (*Chemical Engineering (miscellaneous)*)
