Development and Utilization of Biomass, Coal and Organic Solid Wastes

Guest Editors:

Dr. Qiangqiang Ren
School of Energy and Mechanical Engineering, Nanjing Normal University, Nanjing 210023, China

Dr. Mengxia Qing
School of Energy and Power Engineering, Changsha University of Science and Technology, Changsha 410114, China

Deadline for manuscript submissions:
30 September 2024

Message from the Guest Editors

Biomass, coal, and organic solid wastes are relevant to society's development. They are typically composed of the elements C, H, O, N, S, and others and regarded as carriers of energy and resources. In addition, their use is related to CO_2, SOx, and NOx emissions. Therefore, the development and utilization of them with high efficiency and low emissions are promising for the future. Combustion, gasification, and pyrolysis are developing and valuable utilization methods for biomass, coal, and organic solid wastes, and there are still many research projects in the energy and chemistry fields to develop relevant technologies.

This Special Issue on "Development and Utilization of Biomass, Coal and Organic Solid Wastes" includes, but is not limited to, the following topics:

- Composition analysis of biomass, coal, and organic solid wastes;
- Treatment method and mechanism;
- Utilization method and mechanism;
- Reactor design and optimization;
- Process analysis and optimization;
- Economic analysis and guidance;
- Product utilization and mechanism;
- Biochar and pyrolytic char of coal and organic solid waste.

Editor-in-Chief

Prof. Dr. Giancarlo Cravotto
Department of Drug Science and Technology, University of Turin, Via P. Giuria 9, 10125 Turin, Italy

Message from the Editor-in-Chief

You are invited to contribute either a research article or a comprehensive review for consideration and publication in *Processes* (ISSN 2227-9717). *Processes* is published in open access format – research articles, reviews, and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited, free access to the content. As an open access journal, *Processes* is supported by the authors and their institutes through the payment of article processing charges (APCs) for accepted papers. We would be pleased to welcome you as one of our authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.
High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, AGRIS, and other databases.
Journal Rank: JCR - Q2 (*Engineering, Chemical*) / CiteScore - Q2 (*Chemical Engineering (miscellaneous)*)
