### Message from the Guest Editors

Dear Colleagues,

Research in novel bioactive ingredients and formulations is constantly expanding. Synthetic and natural products with specialized mechanism of action have aroused the interest of Industry and Academic research. Chemical modifications of compounds of natural origin to improve physicochemical and biological properties is a challenge for experts in biomedical sciences.

The special issue “Research of Bioactive Synthetic And Natural Products Chemistry” will curate fundamental and applied methods for the development, analysis and biological properties of synthetic and natural products, and final formulations, as well.

Topics include, but are not limited to, methods and/or applications in the following fields:

- Synthesis and structure elucidation of new synthetic bioactive compounds
- Isolation, chemistry and biological activity of natural products
- Development and effectiveness of innovative bioactive formulations
- Quantification of bioactive ingredients

## Message from the Editor-in-Chief

You are invited to contribute either a research article or a comprehensive review for consideration and publication in *Processes* (ISSN 2227-9717). *Processes* is published in open access format – research articles, reviews, and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited, free access to the content. As an open access journal, *Processes* is supported by the authors and their institutes through the payment of article processing charges (APCs) for accepted papers. We would be pleased to welcome you as one of our authors.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, AGRIS, and other databases.

**Journal Rank:** JCR - Q2 (*Engineering, Chemical*) / CiteScore - Q2 (*Chemical Engineering (miscellaneous)*)
