Deadline for manuscript
submissions:

30 June 2025

Message from the Guest Editors

This Special Issue on “Low-Carbon Management in Energy Systems: CO₂ Capture Technology” aims to cover all the relevant aspects of CO₂ capture technology, with a particular focus on innovative solutions that are currently being explored to achieve practically applicable processes. Topics include, but are not limited to:

- CCS;
- CO₂ capture technologies;
- Precombustion carbon capture;
- Post-combustion carbon capture;
- Oxy-fuel carbon capture;
- Adsorption and absorption;
- Direct air CO₂ capture (DAC);
- Carbon footprint;
- Low-cost and efficient capture of low-concentration CO₂

an Open Access Journal by MDPI

Editor-in-Chief

Prof. Dr. Giancarlo Cravotto

Department of Drug Science and
Technology, University of Turin,
Via P. Giuria 9, 10125 Turin, Italy

Message from the Editor-in-Chief

You are invited to contribute either a research article or a comprehensive review for consideration and publication in *Processes* (ISSN 2227-9717). *Processes* is published in open access format – research articles, reviews, and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited, free access to the content. As an open access journal, *Processes* is supported by the authors and their institutes through the payment of article processing charges (APCs) for accepted papers. We would be pleased to welcome you as one of our authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, AGRIS, and other databases.

Journal Rank: JCR - Q2 (*Engineering, Chemical*) / CiteScore - Q2 (*Chemical Engineering (miscellaneous)*)
