Message from the Guest Editors

Dear Colleagues,

Food safety and quality are the main public health concerns, making the monitoring and chemical analysis of food contaminants a significant issue. Contamination can occur during any step of the food chain, from farm to fork (growing and raising, manufacturing and processing, transport, preparation, and storage). Contaminants can enter the food intentionally or unintentionally, through environmental pollution or food protection measures or during industrial preparation and processing. The analysis of food contaminants can be carried out using various instrumental techniques.

The topics covered in this Special Issue include, but are not limited to, methods and applications in the following areas:

- Environmental pollution;
- Toxic metals;
- Polychlorinated biphenyls;
- Polychlorinated dioxins and furans;
- Pesticides;
- Veterinary drugs;
- Mycotoxins and plant toxins;
- Additives;
- PFAS;
- Disinfection products;
- Acrylamide;
- Instrumental analyses.

an Open Access Journal by MDPI

Technology, University of Turin,
Via P. Giuria 9, 10125 Turin, Italy

Message from the Editor-in-Chief

You are invited to contribute either a research article or a comprehensive review for consideration and publication in *Processes* (ISSN 2227-9717). *Processes* is published in open access format – research articles, reviews, and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited, free access to the content. As an open access journal, *Processes* is supported by the authors and their institutes through the payment of article processing charges (APCs) for accepted papers. We would be pleased to welcome you as one of our authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, AGRIS, and other databases.

Journal Rank: JCR - Q2 (*Engineering, Chemical*) / CiteScore - Q2 (*Chemical Engineering (miscellaneous)*)
