Message from the Guest Editors

High-quality food production, with the use of energy-efficient processing techniques, is currently the greatest challenge for both food producers and researchers. The increasing costs of energy carriers, caused by the global energy crisis, force the search for energy-saving methods of food production. It is also necessary to find by-products processing methods that use functional and nutritional food ingredients or components of drugs and cosmetics.

This Special Issue for the 10th anniversary of *Processes* deals precisely with these issues. Papers sent to the editorial office may be research, experimental, theoretical or computational papers. All aspects related directly or indirectly to food processing are included in the area of this Special Issue. Review papers are also welcome.

Processes (ISSN 2227-9717) provides an advanced forum for process/system-related research in chemistry, biology, material, energy, environment, food, pharmaceutical, manufacturing and allied engineering fields. The journal publishes regular research papers, communications, letters, short notes and reviews. Our aim is to encourage researchers to publish their experimental, theoretical and computational results in as much detail as necessary. There is no restriction on paper length or number of figures and tables.
