### **Message from the Guest Editors**

In recent years, with climate change, the greenhouse effect, and the need to operate within a circular economy, the generated waste has been used and transformed into by-products to produce other products with high added value, thus closing the economic cycle of this industrial process. In response to these urgent needs, Koya University in Iraq is holding its "3rd International Conference on Petroleum: Waste Management in Oil and Gas Industry, April 28-30, 2024".

This Special Issue intends to disseminate the research presented at this conference, which will address the latest developments in the state of the art in this field. Although the target audience of this Special Issue will primarily be the conference participants, some of whom the authors will invite to publish their manuscripts in this Special Issue, this Special Issue is open to all authors in this field

## Message from the Editor-in-Chief

*Processes* (ISSN 2227-9717) provides an advanced forum for process/system-related research in chemistry, biology, material, energy, environment, food, pharmaceutical, manufacturing and allied engineering fields. The journal publishes regular research papers, communications, letters, short notes and reviews. Our aim is to encourage researchers to publish their experimental, theoretical and computational results in as much detail as necessary. There is no restriction on paper length or number of figures and tables.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, AGRIS, and other databases.

**Journal Rank:** JCR - Q2 (*Engineering, Chemical*) / CiteScore - Q2 (*Chemical Engineering (miscellaneous)*)
