Topics include, but are not limited to:

- New power converter circuits (or systems) to improve the efficiency of applications;
- Novel power management methods (control, optimization, or prediction) for increasing the overall operation efficiency of the system;
- New power devices (including power semiconductors, magnetic elements, motors, sensors, and thermal devices) and control devices (MCUs, ICs) for power converter systems that can improve efficiency;
- New analysis and development tools (hardware or software) for the design and implementation of power converter systems to evaluate (or increase) efficiency.

Message from the Editor-in-Chief

You are invited to contribute either a research article or a comprehensive review for consideration and publication in *Processes* (ISSN 2227-9717). *Processes* is published in open access format – research articles, reviews, and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited, free access to the content. As an open access journal, *Processes* is supported by the authors and their institutes through the payment of article processing charges (APCs) for accepted papers. We would be pleased to welcome you as one of our authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, AGRIS, and other databases.

Journal Rank: CiteScore - Q2 (Chemical Engineering (miscellaneous))
