Message from the Guest Editors

This Special Issue on “Advances in Solid Waste Treatment and Design” reviews the outstanding research being undertaken in this field and provides comprehensive coverage of all aspects related to solid waste treatment and design. A wide range of research into the separation, transformation, and recycling of waste materials is covered. Research into thermal conversion technologies, biological and chemical conversion technologies, and landfill operations is also included. High-quality research articles on the various aspects of waste treatment technology and management are brought together, covering both the current status and remaining challenges. Topics include but are not limited to:

- Waste treatment technologies, including physical, chemical, thermal, and biological processes;
- Zero waste, markets, and policies;
- Resource recycling and process design.

an Open Access Journal by MDPI

Technology, University of Turin,
Via P. Giuria 9, 10125 Turin, Italy

Message from the Editor-in-Chief

Processes (ISSN 2227-9717) provides an advanced forum for process/system-related research in chemistry, biology, material, energy, environment, food, pharmaceutical, manufacturing and allied engineering fields. The journal publishes regular research papers, communications, letters, short notes and reviews. Our aim is to encourage researchers to publish their experimental, theoretical and computational results in as much detail as necessary. There is no restriction on paper length or number of figures and tables.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, AGRIS, and other databases.

Journal Rank: JCR - Q2 (*Engineering, Chemical*) / CiteScore - Q2 (*Chemical Engineering (miscellaneous)*)
