### **Message from the Guest Editors**

This Special Issue on “Advances in Solid Waste Treatment and Design” reviews the outstanding research being undertaken in this field and provides comprehensive coverage of all aspects related to solid waste treatment and design. A wide range of research into the separation, transformation, and recycling of waste materials is covered. Research into thermal conversion technologies, biological and chemical conversion technologies, and landfill operations is also included. High-quality research articles on the various aspects of waste treatment technology and management are brought together, covering both the current status and remaining challenges. Topics include but are not limited to:

- Waste treatment technologies, including physical, chemical, thermal, and biological processes;
- Zero waste, markets, and policies;
- Resource recycling and process design.

## Message from the Editor-in-Chief

You are invited to contribute either a research article or a comprehensive review for consideration and publication in *Processes* (ISSN 2227-9717). *Processes* is published in open access format – research articles, reviews, and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited, free access to the content. As an open access journal, *Processes* is supported by the authors and their institutes through the payment of article processing charges (APCs) for accepted papers. We would be pleased to welcome you as one of our authors.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, AGRIS, and other databases.

**Journal Rank:** JCR - Q2 (*Engineering, Chemical*) / CiteScore - Q2 (*Chemical Engineering (miscellaneous)*)
