Message from the Guest Editors

This Special Issue on “Processing and Storage of Agriculture Products” aims to curate novel advances in technologies related to modern agricultural biology, processing and engineering, new material and biology, and food function and analysis, in order to address longstanding challenges in processing and storage of agriculture products. Topics include, but are not limited to:

- The application of modern agricultural biology technology to address challenges in processing and storage of agricultural products (e.g., genetic improvements, synthetic biology, and omic techniques);
- Progress in intelligent-processing, deep-processing, precision-processing theories and technologies of agricultural products;
- Development of new material, biology and engineering technologies that affect agriculture products’ quality and safety, and bioavailability improvement;
- Advances in functional improvement and analysis technology of agricultural products during processing and storage.

Message from the Editor-in-Chief

You are invited to contribute either a research article or a comprehensive review for consideration and publication in *Processes* (ISSN 2227-9717). *Processes* is published in open access format – research articles, reviews, and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited, free access to the content. As an open access journal, *Processes* is supported by the authors and their institutes through the payment of article processing charges (APCs) for accepted papers. We would be pleased to welcome you as one of our authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, AGRIS, and other databases.

Journal Rank: JCR - Q2 (*Engineering, Chemical*) / CiteScore - Q2 (*Chemical Engineering (miscellaneous)*)
