Deadline for manuscript submissions:

**closed (30 June 2019)**

### Message from the Guest Editors

Modern technologies enable chemists to access a wide array of target compounds with minimal time requirements and costs. In particular, the commercial production of compounds of interest using automated platforms has garnered great interest. Innovative efforts to integrate automation can be transformative in the field of process chemistry, which can, in turn, have a significant impact on translational science.

This Special Issue is dedicated to the development, optimization, and innovative processes of automated technologies in process chemistry. Specifically, we invite authors to submit original research or review articles in the field of synthetic organic chemistry. The topics can include, but are not limited to, the application of flow chemistry towards diverse oriented synthesis, from batch-to-flow chemistry for the scale-up production of materials, computational design and integration of automated platforms, renewable/regenerative technologies for chemical reactions, organo-catalysis-mediated reactions, and general chemistry using artificial intelligence.

## Editor-in-Chief

### Prof. Dr. Giancarlo Cravotto

Department of Drug Science and  
Technology, University of Turin,  
Via P. Giuria 9, 10125 Turin, Italy

## Message from the Editor-in-Chief

You are invited to contribute either a research article or a comprehensive review for consideration and publication in *Processes* (ISSN 2227-9717). *Processes* is published in open access format – research articles, reviews, and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited, free access to the content. As an open access journal, *Processes* is supported by the authors and their institutes through the payment of article processing charges (APCs) for accepted papers. We would be pleased to welcome you as one of our authors.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, AGRIS, and other databases.

**Journal Rank:** JCR - Q2 (*Engineering, Chemical*) / CiteScore - Q2 (*Chemical Engineering (miscellaneous)*)
