Biocatalysis, Enzyme and Process Engineering

Guest Editors:

Dr. Pedro Fernandes

Faculty of Engineering,
Universidade Lusófona, 1749-024
Lisboa, Portugal
Be – Institute for
Bioengineering and Biosciences,
Department of Bioengineering,
Instituto Superior Técnico,
Universidade de Lisboa, 1649-004
Lisboa, Portugal

Dr. Carla C. C. R. de Carvalho

iBB – Institute for Bioengineering and Biosciences, Department of Bioengineering, Instituto Superior Técnico, Universidade de Lisboa, Lisbon, Portugal

Deadline for manuscript submissions:

closed (31 December 2020)

Message from the Guest Editors

Enzyme engineering, often coupled to process engineering, has been shown to provide a sound approach to tackle these issues and improve the catalytic and stability features of several enzymes. In addition, methodologies such as continuous flow, already well-established in chemical processes, have been increasingly used in biocatalysis, given their potential to increase overall bioconversion rates due to increased mass transfer and enhanced throughput of material.

This Special Issue on "Biocatalysis, Enzyme, and Process Engineering" aims to address novel advances in the development and application of enzymes in the production of goods of interest for large-scale production. Topics include but are not limited to the following:

- Enzyme engineering towards improved biocatalysts;
- The development of novel process designs for biocatalysis;
- Multienzyme cascade reactions.

Editor-in-Chief

Prof. Dr. Giancarlo Cravotto

Department of Drug Science and Technology, University of Turin, Via P. Giuria 9, 10125 Turin, Italy

Message from the Editor-in-Chief

Processes (ISSN 2227-9717) provides an advanced forum for process/system-related research in chemistry, biology, material, energy, environment, food, pharmaceutical, manufacturing and allied engineering fields. The journal publishes regular research papers, communications, letters, short notes and reviews. Our aim is to encourage researchers to publish their experimental, theoretical and computational results in as much detail as necessary. There is no restriction on paper length or number of figures and tables.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus,

SCIE (Web of Science), Ei Compendex, Inspec, AGRIS, and other databases.

Journal Rank: JCR - Q2 (*Engineering, Chemical*) / CiteScore - Q2 (*Chemical Engineering (miscellaneous*))
