Message from the Guest Editors

This Special Issue on “Process Development, Monitoring, Modeling, and Control for Biogas Cleaning” will collect high-quality research that addresses challenges in the broad area of biogas cleaning, process modeling, and control strategies. Topics include but are not limited to the following:

- Biotrickling filters (aerobic and anoxic);
- Suspended biomass bioreactors (aerobic and anoxic);
- Chemical absorption;
- Physical and chemical adsorption on solid adsorbents;
- Solvent-gas scrubbing;
- Membrane separation;
- Cryogenic separation;
- Process modeling, simulation, and control applications.

an Open Access Journal by MDPI

Editor-in-Chief

Prof. Dr. Giancarlo Cravotto

Department of Drug Science and
Technology, University of Turin,
Via P. Giuria 9, 10125 Turin, Italy

Message from the Editor-in-Chief

Processes (ISSN 2227-9717) provides an advanced forum for process/system-related research in chemistry, biology, material, energy, environment, food, pharmaceutical, manufacturing and allied engineering fields. The journal publishes regular research papers, communications, letters, short notes and reviews. Our aim is to encourage researchers to publish their experimental, theoretical and computational results in as much detail as necessary. There is no restriction on paper length or number of figures and tables.

Author Benefits

Open Access: free for readers, with **article processing charges (APC)** paid by authors or their institutions.

High Visibility: indexed within **Scopus**,
SCIE (Web of Science), **Ei Compendex**, **InspeC**, **AGRIS**, and **other databases**.

Journal Rank: JCR - Q2 (*Engineering, Chemical*) / CiteScore - Q2 (*Chemical Engineering (miscellaneous)*)
