Control and Optimization of Alcoholic Fermentation and Extraction Technology

Guest Editors:

Prof. Dr. Ofelia Anjos

Instituto Politécnico de Castelo Branco, Quinta da Senhora de Mércules, 6001-909 Castelo Branco, Portugal

Prof. Dr. Leticia M. Estevinho

Department of Biology and Biotechnology, School of Agriculture of the Polytechnic Institute of Bragança (ESA-IPB), Campus de Santa Apolónia, 5301-854 Bragança, Portugal

Deadline for manuscript submissions:

closed (31 December 2020)

Message from the Guest Editors

The control and optimization of alcoholic fermentation and extraction technology is a very important issue given the many different products that it is possible to develop and the undeniable increasing awareness of industries, retailers, and consumers regarding the quality parameters of the products.

In this context, this Special Issue will focus on alcoholic beverages—namely, wines, spirits, beers, wines, and others resulting from a fermentation process, followed or not by a distillation, including the following aspects, among others:

- 1. Fermentation process, optimization and control;
- 2. Raw materials;
- 3. Distillation process;
- 4. Ageing technologies;
- 5. Brewing;
- 6. Physicochemical and sensory characterization of fermented and distilled beverages.

Editor-in-Chief

Prof. Dr. Giancarlo Cravotto

Department of Drug Science and Technology, University of Turin, Via P. Giuria 9, 10125 Turin, Italy

Message from the Editor-in-Chief

Processes (ISSN 2227-9717) provides an advanced forum for process/system-related research in chemistry, biology, material, energy, environment, food, pharmaceutical, manufacturing and allied engineering fields. The journal publishes regular research papers, communications, letters, short notes and reviews. Our aim is to encourage researchers to publish their experimental, theoretical and computational results in as much detail as necessary. There is no restriction on paper length or number of figures and tables.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus,

SCIE (Web of Science), Ei Compendex, Inspec, AGRIS, and other databases.

Journal Rank: JCR - Q2 (*Engineering, Chemical*) / CiteScore - Q2 (*Chemical Engineering (miscellaneous*))
