Message from the Guest Editor

This Special Issue on "Control and Optimization of Wastewater Treatment Technology" aims to curate novel advances in the development of new treatment processes along with the application of conventional treatment processes to address longstanding challenges in emerging contaminant control before it discharges to open waterways. Topics include, but are not limited to, the following:

- Development of a new technology to control chemicals of emerging contaminants;
- Resource recovery from wastewater;
- Recycling materials (e.g., slag, biochar, tire rubber) for water treatment; and
- Water quality monitoring and management.

an Open Access Journal by MDPI

Technology, University of Turin,
Via P. Giuria 9, 10125 Turin, Italy

Message from the Editor-in-Chief

You are invited to contribute either a research article or a comprehensive review for consideration and publication in *Processes* (ISSN 2227-9717). *Processes* is published in open access format – research articles, reviews, and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited, free access to the content. As an open access journal, *Processes* is supported by the authors and their institutes through the payment of article processing charges (APCs) for accepted papers. We would be pleased to welcome you as one of our authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, AGRIS, and other databases.

Journal Rank: JCR - Q2 (*Engineering, Chemical*) / CiteScore - Q2 (*Chemical Engineering (miscellaneous)*)
