Model-Based Design of Experiments for Model Identification: New Challenges and Unconventional Applications

Guest Editors:

Dr. Federico Galvanin

Department Chemical
Engineering, University College
London, Torrington Pl, London
WC1E 7JE, UK

Dr. René Schenkendorf

Automation & Computer
Sciences Department, Harz
University of Applied Sciences,
38855 Wernigerode, Germany

Message from the Guest Editors

This Special Issue will highlight novel research in the field of optimal experimental design for model identification investigating methodological and/or practical aspects related to MBDoE. Recent advances in MBDoE under model uncertainty and/or novel developments of MBDoE techniques in the context of automation and control engineering would be of great interest in this issue. Furthermore, we particularly welcome studies investigating unconventional and new applications of MBDoE across sectors.

Special Issue

an Open Access Journal by MDPI

Editor-in-Chief

Prof. Dr. Giancarlo Cravotto

Department of Drug Science and
Technology, University of Turin,
Via P. Giuria 9, 10125 Turin, Italy

Message from the Editor-in-Chief

Processes (ISSN 2227-9717) provides an advanced forum for process/system-related research in chemistry, biology, material, energy, environment, food, pharmaceutical, manufacturing and allied engineering fields. The journal publishes regular research papers, communications, letters, short notes and reviews. Our aim is to encourage researchers to publish their experimental, theoretical and computational results in as much detail as necessary. There is no restriction on paper length or number of figures and tables.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, AGRIS, and other databases.

Journal Rank: JCR - Q2 (*Engineering, Chemical*) / CiteScore - Q2 (*Chemical Engineering (miscellaneous)*)
