Message from the Guest Editor

Dear Colleagues,

The processes in modern enterprises understood as structured activities designed for production, i.e., to transform all inputs into the final product, should take into account the principles of sustainable development and synergy. Enterprises should pay attention to the design of processes, taking into account new technologies that will not have a negative impact on the environment.

This Special Issue on “Processes in Enterprises and Circular Economy Concerning Conventional Energy and Renewable Energy” aims to curate novel advances in the development and application of new technology, innovative solutions (processes, products) for enterprises operating in the new economy.

The subject of this Special Issue includes aspects of the following:

- Emissions and the reduction of CO₂ emissions for vehicles, in particular taking into account methods of powering electric or hybrid vehicles (energy from hard coal, energy from RES) in the energy balance.
- Trends in transport biofuels and alternative fuels
- Human energy use in the life cycle (LCA)
- Energy consumption of food production processes, in particular, the processes of bio and eco products

Message from the Editor-in-Chief

You are invited to contribute either a research article or a comprehensive review for consideration and publication in *Processes* (ISSN 2227-9717). *Processes* is published in open access format – research articles, reviews, and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited, free access to the content. As an open access journal, *Processes* is supported by the authors and their institutes through the payment of article processing charges (APCs) for accepted papers. We would be pleased to welcome you as one of our authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, AGRIS, and other databases.

Journal Rank: JCR - Q2 (*Engineering, Chemical*) / CiteScore - Q2 (*Chemical Engineering (miscellaneous)*)
