

## Environmental Catalysis and Air Pollution Control

Guest Editors:

**Prof. Dr. Zhiming Liu**

State Key Laboratory of Chemical Resource Engineering, Beijing University of Chemical Technology, Beijing 100029, China

**Prof. Dr. Chi He**

Department of Environmental Science and Engineering, State Key Laboratory of Multiphase Flow in Power Engineering, School of Energy and Power Engineering, Xi'an Jiaotong University, Xi'an 710049, China

Deadline for manuscript submissions:

**closed (30 June 2023)**

### Message from the Guest Editors

Environmental catalysis plays a key role in air pollution control, and the catalytic removal of typical air pollutants, such as volatile organic compounds (VOCs), nitrogen oxides (NO<sub>x</sub>), and CO, is a hot topic. Different catalytic techniques and different catalysts are needed to control the emissions from a wide variety of mobile and stationary source processes. As the emission regulations become more and more stringent around the world, the development of advanced catalytic technology and novel catalysts becomes more desirable. Different characterization methods can provide insights into the chemistry occurring within catalysts and help understand how surface chemistry impacts performance, thus shedding light on the design of active, selective, and durable environmental catalysts.

This Special Issue on “Environmental Catalysis and Air Pollution Control” aims to discuss the advances in environmental catalysis for air pollution control among leading researchers and to suggest future directions for development. Topics include, but are not limited to, the following:

- Automotive exhaust catalysts;
- Catalytic removal of VOCs;
- DeNO<sub>x</sub> catalysts;
- Photocatalysis.

Department of Drug Science and  
Technology, University of Turin,  
Via P. Giuria 9, 10125 Turin, Italy

## Message from the Editor-in-Chief

You are invited to contribute either a research article or a comprehensive review for consideration and publication in *Processes* (ISSN 2227-9717). *Processes* is published in open access format – research articles, reviews, and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited, free access to the content. As an open access journal, *Processes* is supported by the authors and their institutes through the payment of article processing charges (APCs) for accepted papers. We would be pleased to welcome you as one of our authors.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, AGRIS, and other databases.

**Journal Rank:** JCR - Q2 (*Engineering, Chemical*) / CiteScore - Q2 (*Chemical Engineering (miscellaneous)*)
