Message from the Guest Editors

This Special Issue on “Extracellular Vesicles in Regenerative Medicine” aims to showcase innovative advances in the development of EVs as therapeutics in regenerative medicine. Topics include, but are not limited to:

- Development of new methods or processes for isolating and characterising EVs from a variety of sources;
- Evaluation of the therapeutic effects of EVs in the repair and regeneration of a variety of tissues;
- Design and/or modification of EVs for use as biomolecule delivery vehicles;
- Optimisation of biomanufacturing processes for EVs to enable scale-up production for translation.

Message from the Editor-in-Chief

You are invited to contribute either a research article or a comprehensive review for consideration and publication in *Processes* (ISSN 2227-9717). *Processes* is published in open access format – research articles, reviews, and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited, free access to the content. As an open access journal, *Processes* is supported by the authors and their institutes through the payment of article processing charges (APCs) for accepted papers. We would be pleased to welcome you as one of our authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, AGRIS, and other databases.

Journal Rank: CiteScore - Q2 (Chemical Engineering (miscellaneous))
