### Message from the Guest Editor

This special issue on “The application of 3D printing in Food Processing” aims to incorporate the novel advances in the 3D printing technology with the rheological behavior of printing materials. Topics include but are not limited to the following:

- Principles of 3D printing and its correlation with rheological behavior of printing materials;
- Novel technology to create materials with self-supporting mechanism during printing;
- Optimization of quality parameters involved in 3D printing operation;
- Future prospect of 3D food printing.

## Message from the Editor-in-Chief

You are invited to contribute either a research article or a comprehensive review for consideration and publication in *Processes* (ISSN 2227-9717). *Processes* is published in open access format – research articles, reviews, and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited, free access to the content. As an open access journal, *Processes* is supported by the authors and their institutes through the payment of article processing charges (APCs) for accepted papers. We would be pleased to welcome you as one of our authors.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, AGRIS, and other databases.

**Journal Rank:** JCR - Q2 (*Engineering, Chemical*) / CiteScore - Q2 (*Chemical Engineering (miscellaneous)*)
