Message from the Guest Editors

In this Special Issue, entitled “*Development of Herbicidal Ionic Liquids*”, we aim to gather research manuscripts and original reviews that focus on the synthesis and characterization of HILs in terms of their physicochemical properties, as well as their biological properties in greenhouse or field conditions. We also encourage the submission of articles focused on the assessment of environmental impact of this novel group of compounds. Moreover, critical voices regarding HILs are also welcome.

Keywords

- agrochemicals
- herbicides
- biological activity
- ecotoxicity
- sustainable synthesis
- plant protection
- weeds
- biodegradation
- soil mobility
- surface activity

Technology, University of Turin,
Via P. Giuria 9, 10125 Turin, Italy

Message from the Editor-in-Chief

You are invited to contribute either a research article or a comprehensive review for consideration and publication in *Processes* (ISSN 2227-9717). *Processes* is published in open access format – research articles, reviews, and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited, free access to the content. As an open access journal, *Processes* is supported by the authors and their institutes through the payment of article processing charges (APCs) for accepted papers. We would be pleased to welcome you as one of our authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, AGRIS, and other databases.

Journal Rank: JCR - Q2 (*Engineering, Chemical*) / CiteScore - Q2 (*Chemical Engineering (miscellaneous)*)
