

Engineering Porous Materials: From Synthesis to Real-World Applications

Guest Editors:

Dr. Hamidreza Mahdavi

Department of Chemical and
Biological Engineering, Monash
University, Clayton, VIC 3800,
Australia

Dr. Joseph Olorunyomi

School of Science, RMIT
University, Melbourne, VIC 3000,
Australia

Deadline for manuscript
submissions:

30 August 2024

Message from the Guest Editors

The Special Issue will serve as a platform for contributions that delve into various facets of porous materials and composites, encompassing design principles, synthesis strategies, characterization techniques, and application potentials. Topics include, but are not limited to, the following:

- Design Principles for Porous Materials: Research focusing on the rational design of porous materials with tailored properties for specific applications.
- Synthesis Strategies for Porous Materials: Studies detailing innovative synthesis techniques for the fabrication of porous materials with controlled morphology, pore size distribution, and surface chemistry.
- Characterization Techniques for Porous Materials: Advances in characterization methods for elucidating the structure, composition, surface properties, and pore structure of porous materials.
- Applications of Porous Materials: Investigations into the diverse applications of porous materials in fields such as catalysis, gas adsorption and separation, environmental remediation, sensing, biomedical applications, thermoelectric generation, and energy storage (e.g., batteries, supercapacitors).

an Open Access Journal by MDPI

Editor-in-Chief

Prof. Dr. Giancarlo Cravotto

Department of Drug Science and
Technology, University of Turin,
Via P. Giuria 9, 10125 Turin, Italy

Message from the Editor-in-Chief

Processes (ISSN 2227-9717) provides an advanced forum for process/system-related research in chemistry, biology, material, energy, environment, food, pharmaceutical, manufacturing and allied engineering fields. The journal publishes regular research papers, communications, letters, short notes and reviews. Our aim is to encourage researchers to publish their experimental, theoretical and computational results in as much detail as necessary. There is no restriction on paper length or number of figures and tables.

Author Benefits

Open Access: free for readers, with **article processing charges (APC)** paid by authors or their institutions.

High Visibility: indexed within **Scopus**,
SCIE (Web of Science), **Ei Compendex**, **Inspec**, **AGRIS**, and **other databases**.

Journal Rank: JCR - Q2 (*Engineering, Chemical*) / CiteScore - Q2 (*Chemical Engineering (miscellaneous)*)
