### Message from the Guest Editors

Energy crisis has recently increased. This motivates everyone to look for alternative/renewable energy resources. Moreover, the global interest in controlling the earth's temperature rise that appears in the wide participation and interest in COP 27 (November 2022, Egypt). Hence, it is aimed in this special issue to focus on the biomass valorization and utilization as a renewable energy resource with potential energy and environmental impacts.

The special issue focuses on publishing original research papers in the area of Solid Waste Valorization and Utilization. The topics include but not limited to:

- Biomass characterization
- Torrefaction
- Carbonization
- Fermentation
- Pyrolysis
- Gasification
- Biochar utilization
- Syngas utilization
- Biogas utilization

## Message from the Editor-in-Chief

You are invited to contribute either a research article or a comprehensive review for consideration and publication in *Processes* (ISSN 2227-9717). *Processes* is published in open access format – research articles, reviews, and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited, free access to the content. As an open access journal, *Processes* is supported by the authors and their institutes through the payment of article processing charges (APCs) for accepted papers. We would be pleased to welcome you as one of our authors.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, AGRIS, and other databases.

**Journal Rank:** JCR - Q2 (*Engineering, Chemical*) / CiteScore - Q2 (*Chemical Engineering (miscellaneous)*)
