University of Naples Federico II,  
Naples, Italy

Deadline for manuscript  
submissions:

**closed (31 December 2021)**

### Message from the Guest Editors

Recently, many clinical studies have been performed to develop new therapeutic strategies for the treatment of metabolic disorders, including obesity, insulin resistance, diabetes, metabolic syndrome. Metabolic alterations related to incorrect dietary habits including fat overnutrition have become common, threatening public health, markedly enhancing the onset and the progression of metabolic diseases and associated immunological and inflammatory complications. However, many researchers have mainly focused on functional studies which attempt to discover metabolic mechanisms of these chronic pathologies.

This Special Issue welcomes papers on research characterized by in vitro and in vivo approaches aimed at identifying specific molecular mechanisms in controlling metabolic diseases caused by lipid overload or high-fat diets in addition to counteracting the associated disorders involving the induction of inflammatory process and immune response.

## Editor-in-Chief

### Prof. Dr. Giancarlo Cravotto

Department of Drug Science and  
Technology, University of Turin,  
Via P. Giuria 9, 10125 Turin, Italy

## Message from the Editor-in-Chief

You are invited to contribute either a research article or a comprehensive review for consideration and publication in *Processes* (ISSN 2227-9717). *Processes* is published in open access format – research articles, reviews, and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited, free access to the content. As an open access journal, *Processes* is supported by the authors and their institutes through the payment of article processing charges (APCs) for accepted papers. We would be pleased to welcome you as one of our authors.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, AGRIS, and other databases.

**Journal Rank:** JCR - Q2 (*Engineering, Chemical*) / CiteScore - Q2 (*Chemical Engineering (miscellaneous)*)
