

Role of Microorganisms in Remediating Contaminated Soils

Guest Editors:

Prof. Dr. Flavia De Nicola

Department of Sciences and Technologies, University of Sannio, Via F. De Sanctis SNC, 82100 Benevento, Italy

Dr. Enrica Picariello

Department of Sciences and Technologies, University of Sannio, Via F. De Sanctis SNC, 82100 Benevento, Italy

Deadline for manuscript submissions:

closed (23 December 2022)

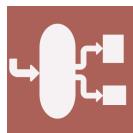

Message from the Guest Editors

This Special Issue aims to create a discussion forum for scientists, policymakers (regulatory bodies, governmental agencies), and city managers regarding biological solutions in soil reclamation. It will provide an opportunity to share new studies and advancements in the bioremediation of contaminated soils (agricultural, industrial, urban) by different classes of pollutants. Relevant articles examining the role of microorganisms in processes that can lead to the remediation of degraded soil are welcome. Submissions on the monitoring and assessment of the efficiency of bioremediation in terms of target contaminants and soil toxicity, as well as the identification and selection of microorganisms useful in the restoration of contaminated soils, are also invited.

Special Issue

Editor-in-Chief

Prof. Dr. Giancarlo Cravotto

Department of Drug Science and Technology, University of Turin, Via P. Giuria 9, 10125 Turin, Italy

Message from the Editor-in-Chief

You are invited to contribute either a research article or a comprehensive review for consideration and publication in *Processes* (ISSN 2227-9717). *Processes* is published in open access format – research articles, reviews, and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited, free access to the content. As an open access journal, *Processes* is supported by the authors and their institutes through the payment of article processing charges (APCs) for accepted papers. We would be pleased to welcome you as one of our authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, AGRIS, and other databases.

Journal Rank: CiteScore - Q2 (Chemical Engineering (miscellaneous))
