

## Enhancing Tribology Processes for Sustainable Engineering Industries

Guest Editors:

**Prof. Dr. Karl David Dearn**

**Dr. Omid Doustdar**

**Dr. Gülşah Ekin Kartal**

**Dr. Iestyn Stead**

Deadline for manuscript  
submissions:  
**closed (19 March 2024)**

### Message from the Guest Editors

The Special Issue "Enhancing Tribology Processes for Sustainable Engineering Industries" in *Processes* aims to explore the intersection of tribology and sustainability, focusing on enhancing processes for improved environmental efficiency. We invite contributions from researchers in tribology and related disciplines to submit their original research papers, reviews, or case studies to this special issue. Topics of interest include but are not limited to novel lubricants and additives for improved energy efficiency, surface engineering techniques for reduced friction and wear, tribocorrosion and its impact on sustainability, eco-friendly materials and coatings for tribological applications, modelling and simulation approaches for sustainable tribology, and innovative strategies for waste reduction and recycling in tribological systems. We particularly encourage submissions highlighting practical applications and case studies demonstrating the successful implementation of sustainable tribology principles in real-world scenarios.

an Open Access Journal by MDPI

## Message from the Editor-in-Chief

You are invited to contribute either a research article or a comprehensive review for consideration and publication in *Processes* (ISSN 2227-9717). *Processes* is published in open access format – research articles, reviews, and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited, free access to the content. As an open access journal, *Processes* is supported by the authors and their institutes through the payment of article processing charges (APCs) for accepted papers. We would be pleased to welcome you as one of our authors.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, AGRIS, and other databases.

**Journal Rank:** JCR - Q2 (*Engineering, Chemical*) / CiteScore - Q2 (*Chemical Engineering (miscellaneous)*)
