Message from the Guest Editors

This special issue on “Novel Electrode Materials for Electrochemical Applications” aims to gather outstanding researcher covering of all aspects related to electrode materials for electrochemical applications (from their fabrication and characterisation to their application in at large scale). This special issue will bring together high-quality research on this topic, focus on both state-of-the-art development as well as future prospects and challenges (e.g. sustainability of material, fabrication method and application). Applications include, but are not limited to:

- Hydrogen economy: water electrolysis and fuel cells
- Energy storage: batteries (including redox flow batteries) and capacitors
- CO₂ utilisation
- Photoelectrocatalysis
- Organic electrosynthesis
- Electrochemical sensors
- General electrolysis (e.g. chlor-alkali industry)
- Water treatment

an Open Access Journal by MDPI

Technology, University of Turin,
Via P. Giuria 9, 10125 Turin, Italy

Message from the Editor-in-Chief

You are invited to contribute either a research article or a comprehensive review for consideration and publication in *Processes* (ISSN 2227-9717). *Processes* is published in open access format – research articles, reviews, and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited, free access to the content. As an open access journal, *Processes* is supported by the authors and their institutes through the payment of article processing charges (APCs) for accepted papers. We would be pleased to welcome you as one of our authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, AGRIS, and other databases.

Journal Rank: JCR - Q2 (*Engineering, Chemical*) / CiteScore - Q2 (*Chemical Engineering (miscellaneous)*)
