Message from the Guest Editors

This Special Issue on "Process System Engineering for Ionic Liquids and Integrated Biorefineries" aims to curate novel advances in the development and application of PSE tools to address longstanding challenges in the process and product design for ionic liquids and integrated biorefineries. Topics include, but are not limited to:

- Product development of ionic liquids;
- Process systems where ionic liquids can be applied in place of traditional solvents;
- Process synthesis, design, integration, and optimization of integrated biorefineries;
- Scheduling and optimization of integrated biorefineries.

Processes (ISSN 2227-9717) provides an advanced forum for process/system-related research in chemistry, biology, material, energy, environment, food, pharmaceutical, manufacturing and allied engineering fields. The journal publishes regular research papers, communications, letters, short notes and reviews. Our aim is to encourage researchers to publish their experimental, theoretical and computational results in as much detail as necessary. There is no restriction on paper length or number of figures and tables.
